Professional Summary

Detail-oriented Data Analyst with strong experience in financial and market data analysis. Skilled in Python, SQL, Excel, and Power BI with hands-on expertise in data cleaning, backtesting strategies, statistical analysis, and visualization to generate actionable insights.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, Matplotlib, Flask), Java (Core)
 - **Core Subjects:** DSA, DBMS, OOPs, OS
 - **Databases & Tools:** SQL (Oracle, SQLite, MySQL)
 - **Visualization:** Power BI, MS-Excel
 - **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis
 - **Machine Learning:** Scikit-learn (Regression, Classification, Model Evaluation)
 - **Tools & Platforms:** Git & GitHub, ChatGPT, Google Gemini, GitHub Copilot
-

Professional Experience

Research Analyst | Junomoneta Finsol Pvt Ltd | July 2025 – Present

- Performed **data analysis** on large financial and market datasets to identify **trends**, patterns, and actionable insights using **descriptive** and **statistical** analysis.
 - **Cleaned, processed, and manipulated** raw data to improve data quality, consistency, and usability for analysis; performed **descriptive backtesting** and created pivot **tables, charts, and dashboards**.
 - Leveraged Python, Excel, SQL, and **Power BI** for data extraction, analysis, backtesting, and visualization, integrating AI-powered automation (**Agentic-AI**) to streamline workflows, pivot generation and KPI reporting.
-

Projects

Sanchari Rog Risk Predictor Machine Learning Web App (Python, Scikit-learn, HTML, CSS, Flask)

- Built a **Machine Learning** classification model achieving 82% accuracy to **predict the probability** of communicable disease infection (Malaria, Dengue, etc.) based on environmental and behavioral features such as **water logging, clean water availability, household hygiene, and mosquito net usage**.
- Performed data preprocessing, feature engineering, and model training using **Python** (Scikit-learn, Pandas, NumPy) to ensure accurate risk estimation and reliable predictions.
- Developed an interactive and **user-friendly** web interface using **HTML, CSS** and **Flask** enabling users to input **conditions** and receive real-time **infection probability scores**.

Equity Market Dependency on Multiple Factors (Python, Excel, APIs, SQL, Power BI)

- Conducted **quantitative research** on 11 years of **Implied Volatility & gap-opening** data to identify high-probability intraday continuation and **reversal patterns** in equity markets.
 - Applied statistical techniques (**mean, standard deviation, probability analysis**) and performed Python & Excel-based backtesting to validate hypotheses and reduce market noise.
 - Built interactive **Power BI** dashboards to visualize IV trends, gap behavior, and **key performance metrics** for faster data-driven **market insights** and **decision-making**.
-

Education

- **Master of Computer Application (2023-2025)**
Noida Institute of Engineering and Technology, Greater Noida, Uttar Pradesh
 - **Bachelor of Science (Mathematics) (2020-2023)**
Deen Dayal Upadhyay Gorakhpur University, Gorakhpur, Uttar Pradesh
-

Certifications

- **Data Analysis using Python, Excel, SQL, Tableau and AI-Assisted Tools (ChatGPT)** - Udemy
- **Programming with Python** - Internshala
- **Design Thinking for Innovation** - Coursera
